SDF AI Policy Assistant User Manual

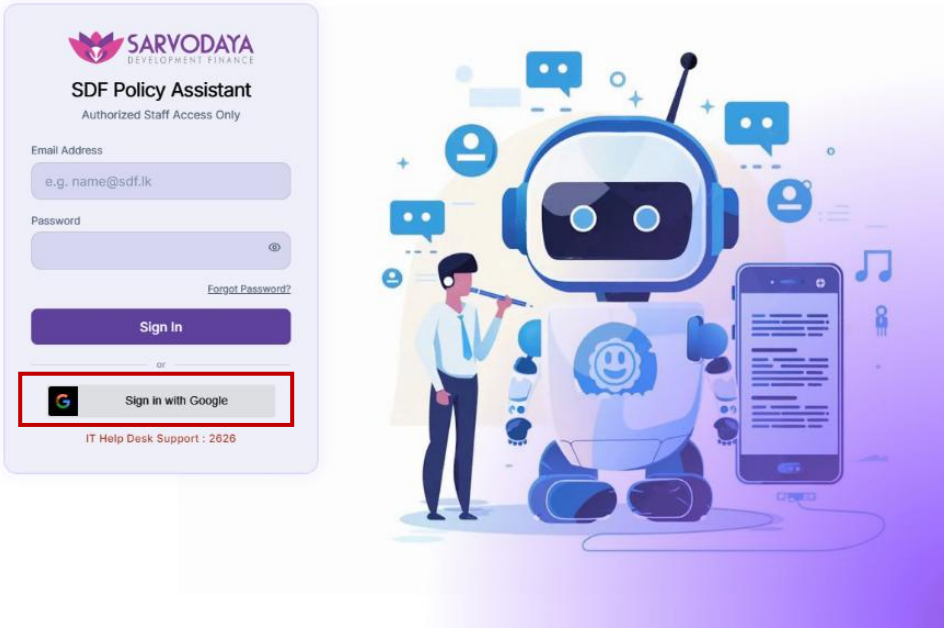

Welcome to the SDF Policy Assistant user guide. This platform is designed to help SDF staff quickly search, retrieve, and understand official company policies and documents using advanced AI assistance. Follow this guide to seamlessly navigate the system.

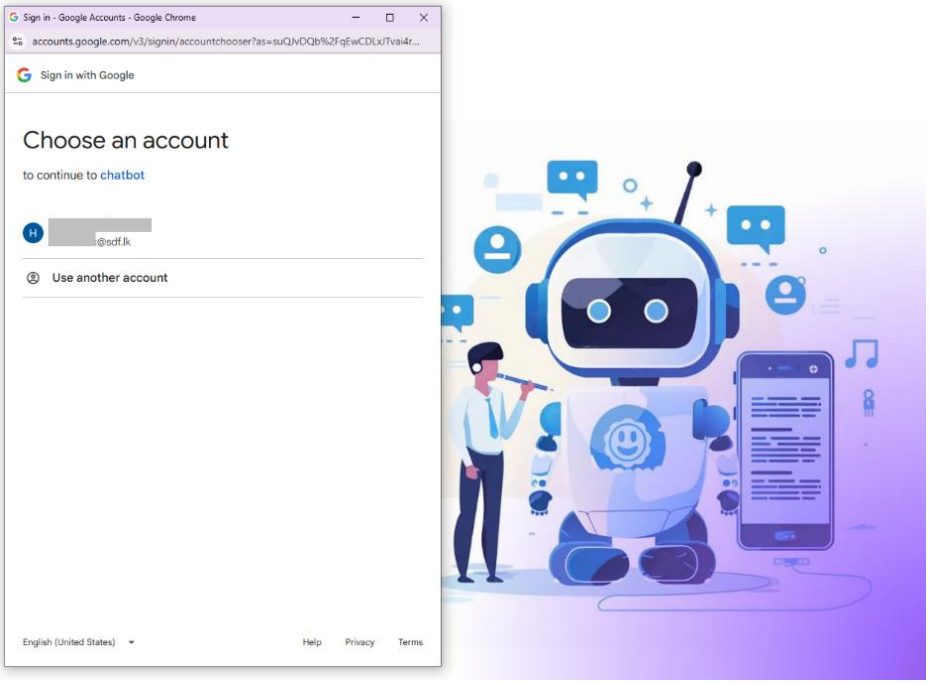

1. Access the system via the SDF HUB (Intranet). Click on the **"Sign in with Google"** button and use your official SDF corporate email address.

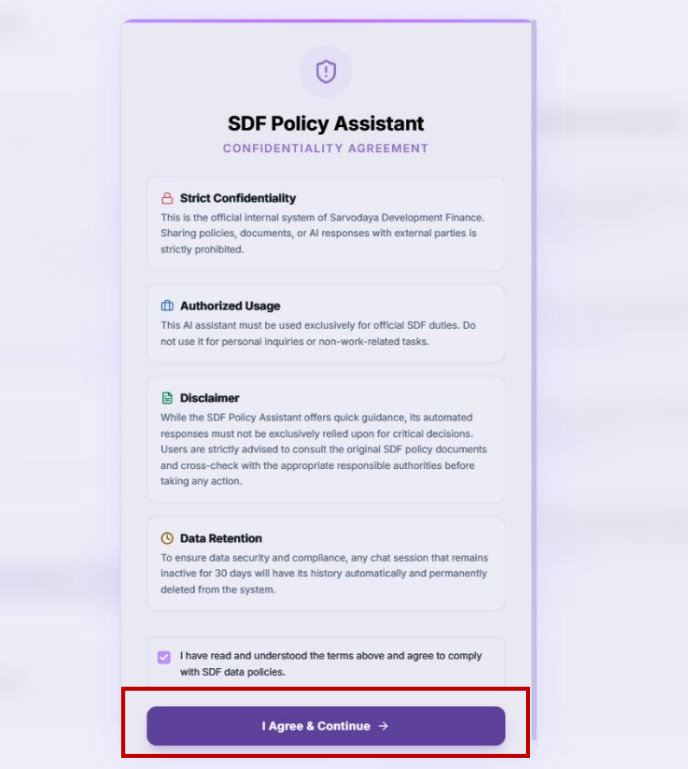

Note: If a security warning appears, please select Continue to Site to proceed. This warning is expected and can be safely ignored.

2. Upon your initial login, you will be required to review the SDF Confidentiality Agreement. Please read the document carefully and click **"I Agree & Continue"** to proceed to the system.

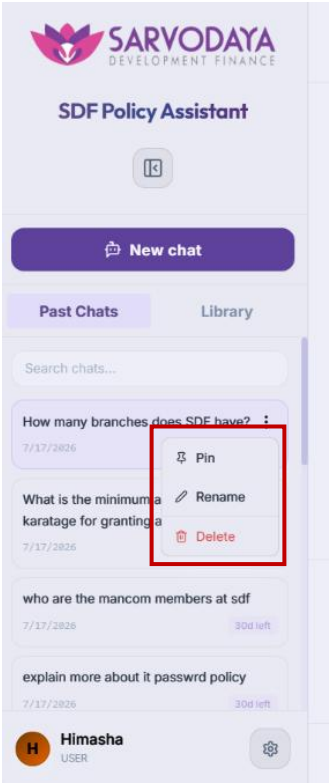

3. Type your question into the input box at the center of the main screen and click the Send button.

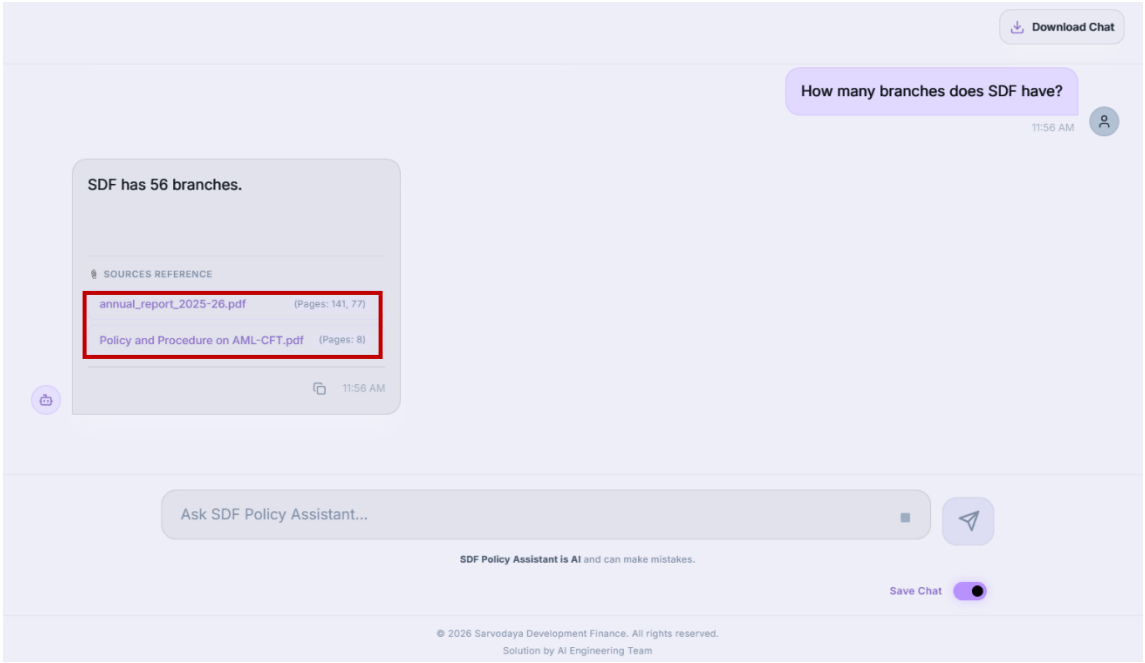

4. Toggle the **"Save Chat"** switch at the bottom right of your screen to keep a conversation in your history.

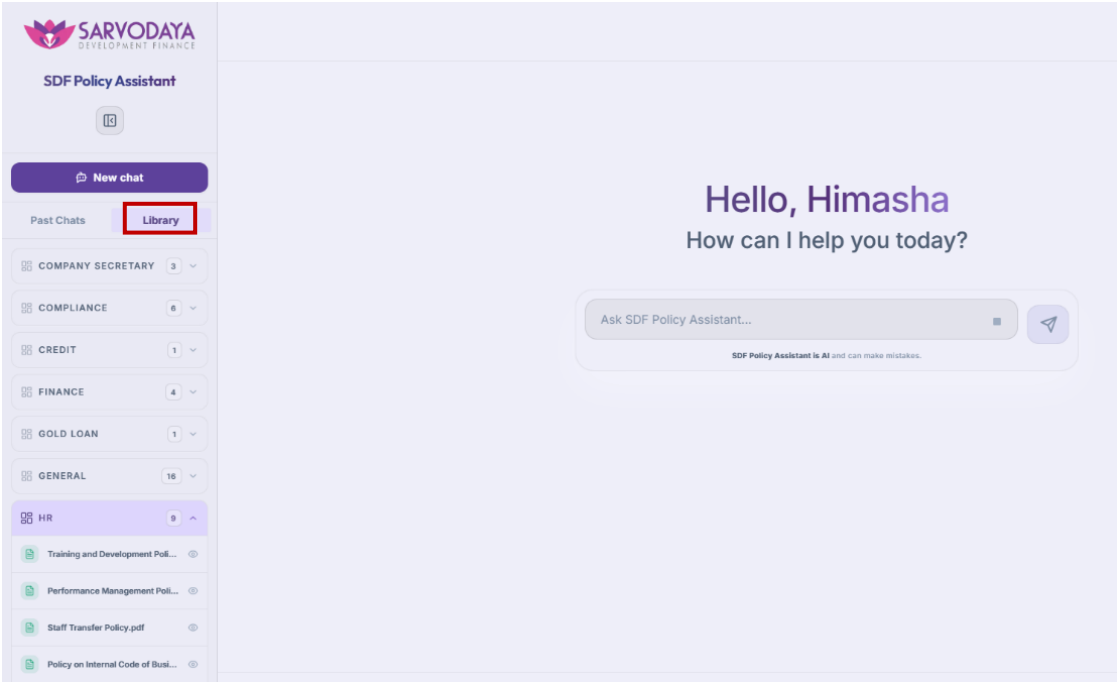

5. Your sidebar displays your past chats, allowing you to easily pin, rename, or delete them using action icons. You can also monitor each chat's 30-day auto-deletion countdown (e.g., "30 days left") and download your entire chat history at any time for safekeeping.

6. Every response includes the exact reference documents and page numbers used to generate the answer. Simply click on a reference link to open and view the source document directly.

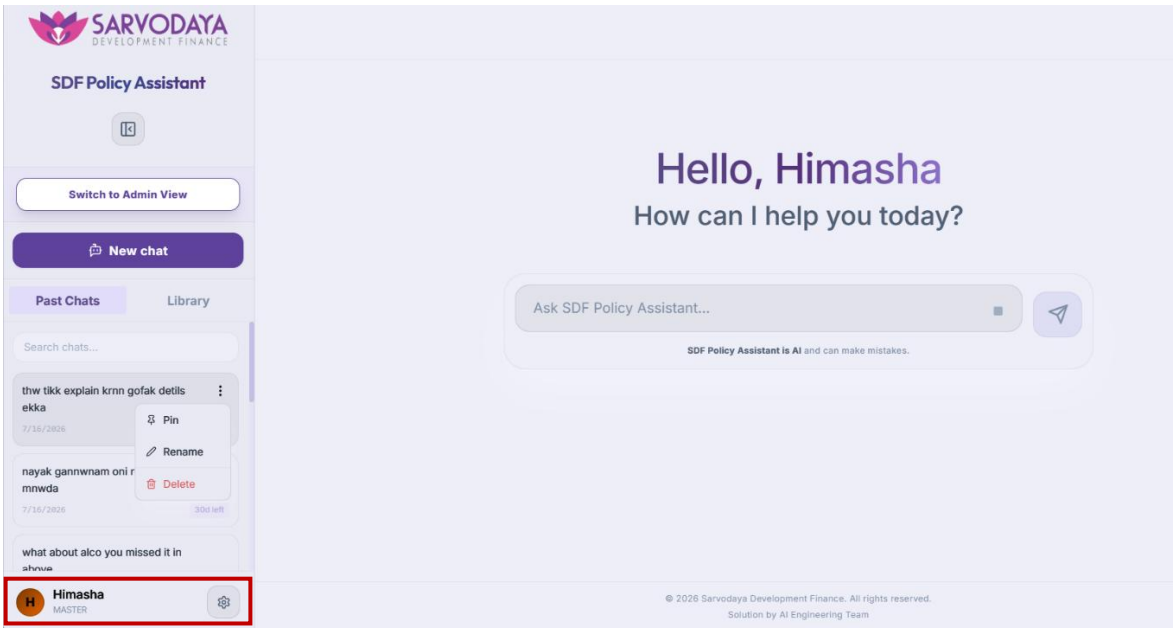

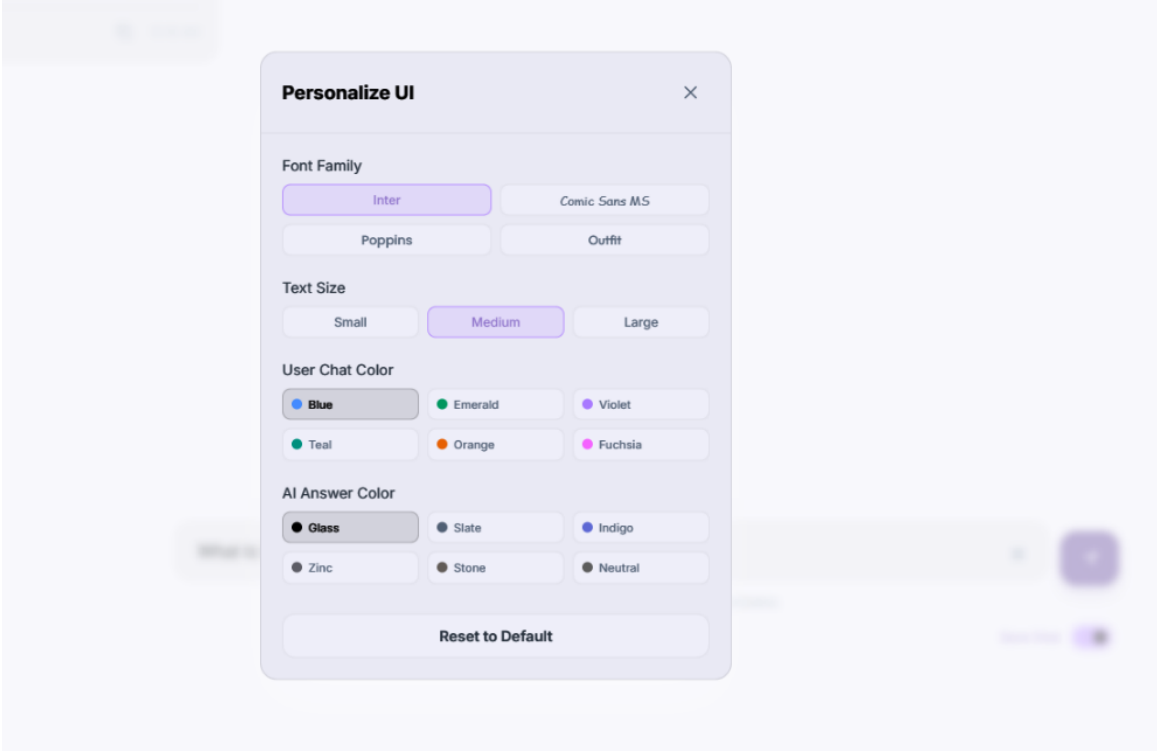

7. You can view the list of available policies in the **library** section of the left sidebar. Simply click on any policy name to open and view the full document.

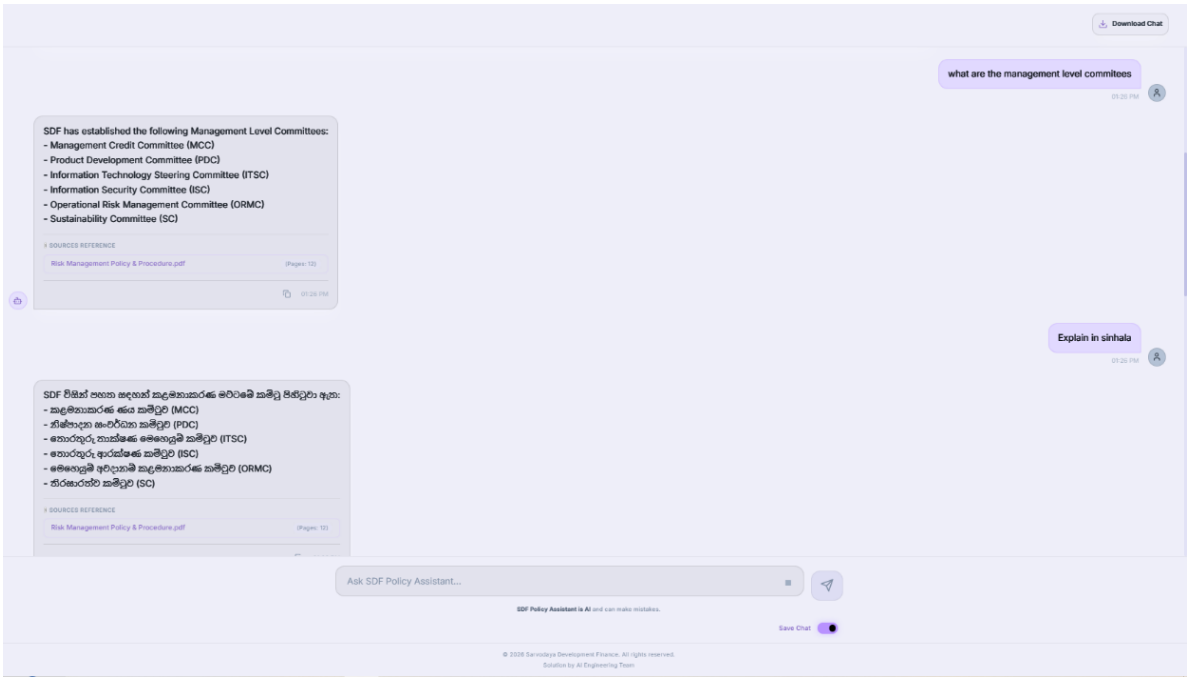

8. Click the **Settings** icon located at the bottom of the left sidebar to toggle between Light and Dark modes and customize your interface preferences to suit your workflow.

9. You can get responses in **English, Sinhala, and Tamil**, and the platform also fully supports **Singlish** for your convenience.

Please note that the SDF Policy Assistant is continuously training and evolving, therefore, the style and structure of the responses may vary depending on how you phrase your questions.
